

## Ausschreibung Mono- und/oder Kombi-Bachelorarbeit (B.Sc.)

### „A Chatbot for Guiding Collaborative Communication on Information Seeking “

Beschreibung:

The goal of this thesis is to develop a chatbot that guides the communication among learners during the collaborative information seeking process. An evaluation study is required to investigate whether the developed chatbot promotes learners' acquisition of skills related to seeking, evaluating, and using online information successfully. This thesis requires the candidate to carry out the following tasks:

- Being familiar with Chatbot-Framework RASA
- Developing a dialog model for collaborative information seeking
- Evaluating the chatbot

Anforderungen: Programming experience with Python or Java
